Jeti 3324 SOLVENT RTR

Jeti 3324 Solvent RTR

The Jeti 3324 Solvent Roll to Roll, fresh off the press, with 24 Spectra print heads is unquestionably the fastest 3.3m (10'10") meter grand-format printer on the market today. True 600 dpi (1200 apparent) and 6 colors graphics on the Jeti 3324 puts it in a class of its own, producing quality that competes with conventional large format inkjet printers at far lesser cost. The Jeti 3324 also is available with a back-lit option enabling printing on both sides with perfect registration which allows for brilliant warranted backlit signage. The Jeti 3324 is also available in a 300 dpi 4 color high speed model achieving between 100 -130 sqm/hr (1075-1205 sq.ft/hr) depending on quality requirements for extra large images such as billboards. At the forefront of the technological enhancements is the software upgrade, which can detect if any individual nozzle may be misfiring. The software will automatically compensate the saturation, safe-guarding the image output. This safe-proof technology is the first of its kind in the grand-format arena. Also included with the automatic head-capping feature (auto caps in 15 minutes if machine sets) is an automated air vacuum system that eliminates manual head wiping.
