Océ Arizona Series UV Flatbed Printers

Océ Arizona Series is the best-selling UV flatbed printer family in the world.

Every model uses UV curable inks and Océ VariaDot® imaging technology to deliver near-photographic image quality. Each is built on a true flatbed

architecture to print on almost any rigid media or object, and

each offers a Roll Media option for printing onto flexible materials.

A White Ink option is available on select models. The

Océ Arizona Series is the most honored with 25 industry awards to date including seven DPI/SGIA Product of the Year awards and a Viscom Innovation award.

Extra large table,
high-volume production

Standard size table,
high-volume production

Innovate your business

With an Océ Arizona Series printer, you can print on irregularly shaped objects or non-square media, heavy substrates such as glass, or materials that have an uneven surface such as wood. Add value to a metal cookie box, a DVD, a piece of furniture, a pane of architectural glass, a sheet of painted aluminum, wood, MDF, or even a full-sized garage door. Using the White Ink option to its full effect can have a very positive impact on the margins that you can demand of your customers. The Océ Arizona Series offers unparalleled versatility if you're serious about innovation and higher margin printing applications.

Extra large table, mid-volume production

Océ Arizona 360 XT

2.50m x 3.05m (98.4" x 120")

48 mm (1.89")

6 to 42 picoliter droplets, 318 nozzles,
two printheads/color, single row design
