- Airport Panels
- Truckside
- Fleet Graphics
- Backlit Displays
- Scaffolding Covers
- Exhibition Signage
- Inflatable Signage
- Point-of-Purchase
- Building Wraps
- Wall Murals

## Seam Types:

## Then you need a Miller Weldmaster CS-112!

For the quickest and most attractive seam possible in the flexible sign industry, Miller Weldmaster has designed the CS-112 Cross Seamer. The CS-112 provides a complete finishing solution for the flexible sign builder with high production and precision work needs.

The CS-112 will seam panels together either prior to printing or after printing. Regardless of printer size, the CS-112 will help you produce and finish any size graphic your customer requests.

# Finish It!

**Dual Laser Alignment**

Make big signs out of little prints: Our exclusive dual laser line alignment system, along with our vacuum track holding system, makes lining up printed images a snap! Simply align each edge of the printed image with the corresponding laser line and press start. Your multiple printed images will become one!

Not only will the Miller Weldmaster CS-112 seam your product, it will trim your printed flex face as well! With a pneumatic rotary cutter on each machine, the CS-112 gives you the capability to cut a long, straight, laser-guided line every time. The CS-112 will weld your product in one pass and trim your product in another pass with very little fabric handling.

## CS-112 Sign & Billboard Seaming/Cutting System

*The CS-112 Cross Seamer can be made in any size from 3 meters to 20 meters!*

**New Ultrasonic Cutter Option for Fabrics**

# Hang It!

Installation of final product on Times Square.

Finished product on Les Champs Elysées - Paris, France

- Welding speeds faster than any other sealing technology
- Superior seam strength for a quality product
- Easy to operate and maintain for maximum up-time
- Will NOT affect other surrounding electronic equipment so placement of a Miller is not critical
- Welds between the fabrics, giving your finished product a clean look
- Available in various sizes to fit your seaming needs

MILLER

# About Miller Weldmaster

Miller Weldmaster Corporation is a manufacturer and innovator of rotary hot air / hot wedge welding equipment for the thermoplastic and industrial fabric industries. Our company has the experience to research, design, and build practical systems with the latest in heat-sealing technology. We can accommodate all of your product fabrication needs - from helium-filled blimps to truck tarpaulins to flexible air ducting.

Miller Weldmaster's reputation rests on service, dedication, and the best possible equipment. We will guarantee to provide all three and more. The quality of your end-product is important to us, and this concern shows in the performance of our equipment. Miller Weldmaster does not just design, build, and sell machinery. We are committed to providing long-term service and solutions to your company through technical and application support. We offer you a wide range of equipment from "ready to ship" heat sealers to complete customized systems.

Over the past 30 years, Miller Weldmaster Corporation has developed many of the industry's most significant "firsts" in the advancement of heat-sealing technologies. Our worldwide range of customers and their applications have allowed us to gain extensive knowledge of the various projects that require heat sealing. We design and build our equipment based on this experience.

*Let Miller Weldmaster be the solution to your heat-sealing needs.*

*"Proudly servicing  
our customers in  
over 50 countries."*
