Offer more with production level LED printing

Designed to drive productivity, the two-meter EFI™ VUTEK® GS2000LX Pro LED printer gives you the ability to print on thinner and specialty substrates while lowering costs.

[Overview](#) [Features](#) [Specifications](#) [Applications](#) [Resources](#) [Support](#)

The EFI™ VUTEK® GS2000LX Pro is a fully loaded, production-level LED UV-curing hybrid printer with true grayscale technology that extends the range of supported substrates and print providers' bottom line with an innovative ink curing technology. It reduces operating costs with less material fall out and smooth production runs, and boosts productivity with its continuous print printing capability. No other technology in its class can deliver the environmental benefits to satisfy demands for a greener printing solution with less waste, fewer consumables and decreased power consumption.

Print on more substrates with a production-level LED printer

- Delivers high definition point-of-purchase graphics with eight colors plus white and advanced multilayer white ink printing
- Extends the range of supported substrates with innovative ink curing technology that delivers high quality and high adhesion
- Increases up time and productivity, while decreasing maintenance costs
- Reduces waste with consistent color output and simple operation
- Satisfies customer requests for a greener print solution
