The EFI™ VUTEK® HS100 Pro is a high-speed digital UV inkjet press that represents a true alternative to analog equipment. Innovative imaging technology driven by the Orion OS software platform delivers critical color accuracy and consistency your customers' demand with the productivity and digital efficiencies you need.

The VUTEK HS100 Pro allows you to take on short-run jobs more profitably, while letting you produce longer sheet runs at a lower cost per print than analog technology.

## Revolutionary Productivity and Image Quality

- 3.2 meter hybrid digital UV press handles up to 100 boards per hour; up to 70 boards per hour in Point-Of-Purchase mode (600 dpi binary print mode)
- Maximizes ink yield for a lower total cost of ownership with true grayscale heads and ink delivery system
- Innovative Pin & Cure technology delivers precise ink lay down for better image quality and high production speeds, gloss control, increased color gamut, wider output capability and fewer artifacts
- Minimizes downtime, waste and loss potential with sophisticated warning and detection systems
- Enables continuous shifts with its rugged, industrial design that makes it suitable for 24/7 operation
- Runs multiple jobs at once with multi-queue, eliminating the need to rip larger layout files
